

Instruction for the use of
Medical Equipment Provided by the Town of Sandwich

The Town of Sandwich has provided you with certain medical equipment at no charge to you. This equipment has been donated to the Town from various sources and has not been cleaned or sanitized by the Town prior to its distribution.

You are advised that the following cleaning procedures should be performed prior to any use of equipment in the interest of protecting yourself against the inadvertent spread of organisms that may cause illness.

All equipment must be thoroughly cleaned before and after use!

TO ASSURE PROPER CLEANING, FOLLOW THE DIRECTIONS BELOW:

1. Clean all equipment thoroughly with hot, soapy water.
2. After cleaning as required above, thoroughly wash all areas of the equipment with either Lysol wipes or a bleach solution (1/4 cup bleach to 1 gallon of water). Please read the safety directions on the bleach bottle before using. Wear protective (rubber) gloves and be careful not to get this solution in your eyes.
3. Rinse the equipment thoroughly with water.
4. Dry completely.

Please call the office to set up an appointment to return equipment.

Please do not leave equipment at the Council of Aging or outside the shed.

Thank you for your cooperation!
